How to use these Files

Using the Angular 2 CLI
1. Open a terminal/ command line window and navigate into this folder
2. Run `npm install` to install all required dependencies
3. Run ng serve to use the Angular 2 CLI to compile all files and start the server

Using another Setup
1. Copy the src/ folder (and all ist contents) into your project src/ folder
2. If needed: Adjust imports or your compilation config (depends on your setup)
